

NEW YORK MATH CIRCLE

Summer 2008

Courses for High School Students

July 8 – July 24
weekdays
10am - 3pm

At the Courant
Institute
at NYU

www.nymathcircle.org

Problem Solving

Interesting topics and intriguing problems will be explored in a casual setting, providing ample challenges for students of varying levels. This course is intended for students wishing to hone their reasoning and analytical skills, to practice for a math team, or simply to have fun learning great math.

Introduction to Research

Essentials of crafting a mathematical research paper or project will be presented in detail, addressing topic selection, problem analysis, sources, resources, design fundamentals, extensions, techniques of writing, and more. A wealth of examples will be available.

The fee for a course is \$250, with need-based waivers available.

Visit www.nymathcircle.org for details and registration information.
